

CHANGES FOR ACCTRON MOBILE APP

1. Placement of the text '**ACCTRON**' that appears right before the login screen needs to be correctly aligned. 'A' and 'N' of Acctron are not completely visible.
2. On logging in, multiple messages appear before the 'login successful' message.
3. 'Login Successful' appears in a large black band which seems inconsistent with the design.
4. The Petrafos logo needs to be replaced with the Acctron Logo

5. Home Page

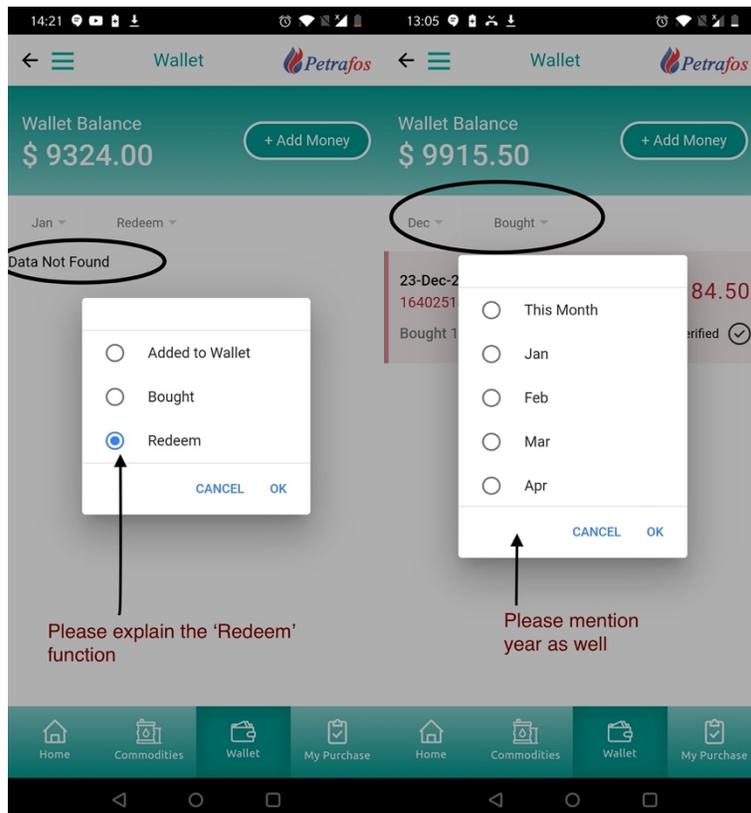

Suggestion for a new design is attached below

- The commodities could be listed down instead of appearing as tabs in the manner portrayed on the screen. Assigning a tab to each commodity may make the design cluttered and confusing, especially with multiple subscriptions that extend beyond the first row. A product list with prices and option to buy right on the landing page would also be optimum in terms of efficiency and speed (a quintessential for the trading industry).
- In this scenario, there would be two tabs only, one listing the products (Overview) and the other displaying the news (News).
- The name of the products itself could be hyperlinks connecting to a page with the associated historical data.
- The commodities page would become irrelevant in the new design and can be removed.
- 'Add' option can be appended to the end of the list and should lead to the 'Contact Us' page using which the customer can send a request to the administrator to add to the list of commodities.

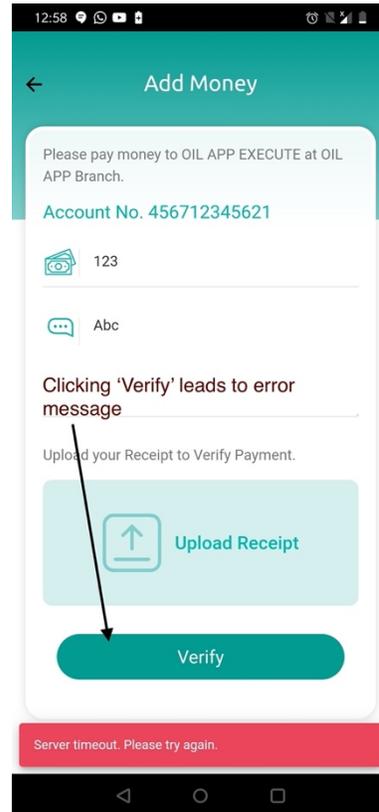

6. Wallet Page

- 'Select Month' and 'Select' options for filtering results are dimly visible due to the light colour.
- 'Select' needs to be made more specific, 'Select Action', perhaps.
- An option for selecting the year should also be present.
- Please explain the Redeem function.
- Instead of 'Data not Found' message for months with no action from the client, a more specific message needs to be displayed.
- The filter choices do not reset back to default after navigating away from the page.

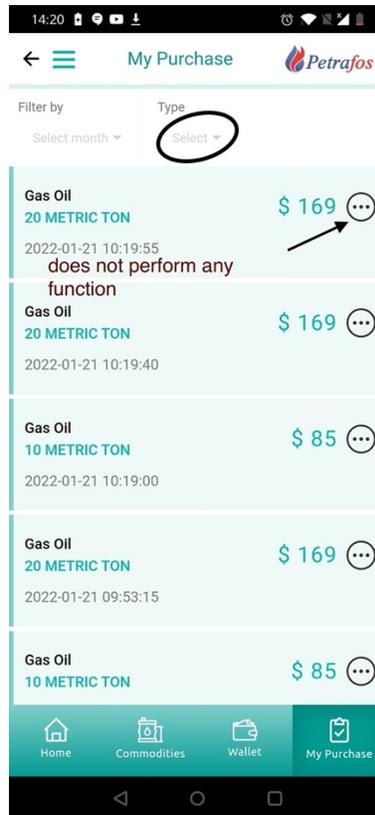

7. Add Money Page

- 'Server Timeout' message appears on clicking the 'Verify' button
- The correct bank details need to be added.

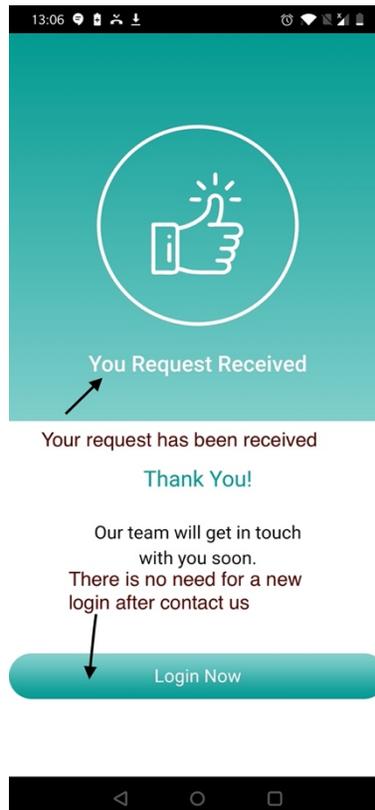

8. My Purchase Page

- 'Select Month' and 'Select' options are dimly visible.
- Filter category for the search results should be month, year, and product
- The three dots next to amount do not perform any function
- The filter choices do not reset back to default after navigating away from the page

9. Contact Us

- Grammatical error in the message
- There is no need for a new login after customer sends a request to the administrator

10. My Profile Page is not functional

11. After completion of purchase, the message “**Successfully Order Placed**” appears. Please replace with “**Your order has been placed successfully**”

12. For new user registration, without an invite code, the message “Don’t Have an Invite Code” along with the “Generate Now” button is sufficient. “**You Need to Generate First**” can be omitted.
